

KONICA MINOLTA

MOHYLA CZ s.r.o.

Daňová & účetní kancelář - Tax & accounting office

SPACE-SAVING I.T.

THE ANSWER FOR A ROBUST I.T. SYSTEM THAT OPTIMIZES EXISTING SPACE

WHO

Mohyla CZ s.r.o.

WHAT

Accountant and tax office

WHERE

Czech Republic

SIZE

20+ employees

SITUATION

Mohyla relies on its IT infrastructure to provide a high standard of accounting services. They needed a new robust IT system that gave them 100% security with the ability to backup data on their own virtual servers. The challenge was that they did not have much space for any IT equipment.

SOLUTION

Building on the print service already provided, Konica Minolta was able to offer Workplace Hub with proactive monitoring – a complete IT solution from the same space that used to be their multifunction printer. The system integrated seamlessly with their existing virtual servers to protect, secure and store all data. Konica Minolta is now taking care of the whole IT from print to digitization and all business data processing.

WHY WORKPLACE HUB

- Simple and manageable monthly payment packages that remove the burden of an upfront investment
- Predictable spend due to one vendor solution for the entire IT system
- A space saving solution providing all the IT hardware needed into a one square metre space
- Data backup and proactive monitoring of the core IT environment providing peace of mind
- All data is protected and securely stored
- Whole IT solution from print to digitization to all business data processing from one provider

“As a small business, we don’t have much space for IT equipment – but we rely on having a robust IT infrastructure to provide a high standard of accounting services. With Konica Minolta’s Workplace Hub, we now have a complete IT solution from the same space that used to be just a printer! Even better, is that the system integrated seamlessly with our existing virtual servers, to protect, secure and store all data.”
